- MSSQL, Git, Postman, PostgreSQL, Visual Studio

Language

- English (Good at reading documents, beginner speaking level)

ABOUT

I am Furkan, a Mechanical Engineering graduate who has successfully transitioned into the world of software development. Over the past year, I have been actively involved in creating robust and efficient software solutions, with a focus on backend development using C# and SQL for writing stored procedures. My proficiency extends to Node.js for backend development and React for frontend, allowing me to build comprehensive and dynamic applications. This diverse skill set has empowered me to approach complex problems with versatility and creativity. I am a passionate learner who thrives on challenges and enjoys the collaborative aspect of software development. I am dedicated to expanding my knowledge and contributing my skills to innovative projects in this ever-evolving field.

I am excited to explore new opportunities and make meaningful contributions to the dynamic landscape of software development. If you are in search of a dedicated and adaptable software developer with a diverse background, I am ready to join your team and contribute to your projects.

PROJECTS

- [Travelers app backend with C# Web API](#)
- [Tour Company with SQL](#)
- [Euroleague Information-Backend with Node.js](#)
- [Euroleague Information-Frontend with React.js](#)
